

RGS MODELS

Wagons and other items for SM32 or SM45 Garden Narrow Gauge Railways

Catalogue – Autumn 2025

About RGS Models:

All the items in this catalogue are supplied ready built, fully finished, painted and ready to use. They are NOT kits.

Wagons - both industrial and “standard” – are available in either red oxide or matte grey finish, with chassis parts usually in matte black. Running gear and couplings are from the range produced by Peter Binnie and the wheels are insulated so they are suitable for use on electrified track. Wagon construction is usually in wood, with the exception of those that represent “steel sided” rolling stock.

The industrials are all built using the Peter Binnie bolster chassis, which has 16mm wheels. Wooden construction is mostly used, except for the “steel sided” open wagon and the peat wagon, which are in plasticard. The wagons generally measure around 110mm long by 65mm wide. All are ONLY available in 32mm gauge at present.

The “Standard” wagons all use Peter Binnie’s 24mm wheels on stainless steel axles, running in plastic “Ffestiniog” style axle boxes mounted on a wooden chassis. They can be fitted with a chassis and wheel sets made for either 32mm or 45mm gauge track as requested on ordering.

Further details and more photos available by request – email me for more information.

Ordering

To make an order for an item from my range, just drop me a message by eMail to:

grahamsmith1403@gmail.com

Remember to state clearly the model required, the **gauge** (32 or 45mm) where applicable, the finished **colour**, and any special requirements.

No payment is required until the model is ready to post to you, at which point I will send you an invoice with payment instructions.
